

BeyondMobile®

Laptop Access

To Do:

Find the best way to go wireless, so I can stay connected and stay productive from just about anywhere.

Cbeyond now offers mobile broadband access to email, the Internet, corporate networks and business applications with BeyondMobile Laptop Access. Featuring the Novatel Wireless Ovation™ MCD3000 USB Modem and Merlin™ X720 Express Card, the latest additions to our variety of Cbeyond's mobile offerings that keep you connected whether you're traveling across town or across the country. Say goodbye to hunting for Wi-Fi "hotspots" — the BeyondMobile Laptop Access service gives you speeds of up to 3.1 Mbps wherever you can connect to the 3G cellular network. Once again, Cbeyond has done the research to select the best mobile data solution for the enterprising mobile workforce — all from one provider, with one bill, one account management tool and one number to call for support.

How it Works

- Select from your choice of mobile broadband modems:
 - Ovation MCD3000 USB Modem – Universal device that works with notebooks and desktops for mobility. Includes external Y cable to increase antenna power in poor coverage areas.
 - Merlin X720 Express Card Modem – Smaller and lighter, this device is for use in new mobile computing notebooks that support the Express Card interface.
- Add BeyondMobile Laptop Access to your BeyondVoice® package.
- Install software on your computer.
- Insert your pre-activated broadband modem into your computer and you're ready to go.

Why Choose BeyondMobile Laptop Access?

- Unlimited* broadband access – no overage charges.
- Download large attachments at broadband speeds.**
- Send large files such as presentations, photos or graphics.
- Securely access your corporate network using VPN.
- Compatible with other Cbeyond applications such as VPN and Secure Backup & Fileshare.
- National 3G mobile network coverage with broadband access in airports as well as while traveling via train or car.
- No more fumbling with Ethernet cords and hit or miss service/connectivity while staying at hotels.
- High performance built-in antenna.
